HMS CS

Software update with many unique advantages! Never before has a successful hypertension treatment been so easy! The HMS CS software combines screening, diagnostic and follow-up of all patient groups for a complete and successful blood pressure therapy in one software. Use this versatile combination of functions for your sustainable therapy success!

All cardiovascular parameters combined in one solution

In this new form the new license management is unique world-wide. In addition to the basic functions, you can subsequently activate central blood pressure (cBP) or complete pulse wave analysis (PWA) with 8 parameters for ideal cardiovascular management. Determine which values you prefer and make individual adjustments depending on your preferences. All measured data is summarized in clear graphics and can be easily taken from the report.

Simple & self-explanatory operation

Unique new functions allow to significantly simplify your daily practice routine via efficient work flows. It has been designed for most hardware set-ups and optimized for touch operation. Integrated help functions guarantee a fast and smooth operation for your daily use. The improved user-friendliness allows easy transfer of all relevant data from the HMS CS for statistical evaluation in an Excel format.

Trendsetting - blood pressure limits for children & adolescents Paediatric therapy decisions with blood pressure limits in no time at all - this is made possible by the integration of four internationally recognized blood pressure limits with adjustable confidence intervals (90%, 95%, 99%). The following references are now available for you to choose from:

- **KiGGS** study by the Robert Koch Institute - recognized by the German Hypertension League
- **Wühl et al.** published in the Journal of Hypertension - recognized by the "German Working Group on Pediatric Hypertension"
- **Lurbe et al.** published in the Journal of Hypertension - recognised by the "European Society of Hypertension"
- **Flynn et al.** published in the Journal of Hypertension - recognized by the "American Heart Association & American College of Cardiology"

Free updates in future - We integrate new operating systems to ensure that you are always up-to-date. New software updates become available once a year - free of charge for you!

FAST, EFFICIENT, RELIABLE - that is your expectation for improved performance in everyday practice
